New WRES seals are upgraded to Silicon Carbide, except the XJF-120 units are carbon. Carbon is available upon request. O-rings are HNBR, same as Frick OEM.

Standard WRES exchange seals are upgraded to Silicon Carbide The XJF-120 are carbon. The 151, 233, 283 , 355 exchg. seals are also stocked in carbon. O-rings are HNBR

All o-rings contained in installation kits are made of HNBR materials (same as OEM)

New style 120 tools will be loaned for installation of seal, but must be returned. A \$ 500.00 charge will apply if the tools are not returned!

Lip seals, used with certain models, are included in the installation kit and will be of same material composition as OEM
